TROY STREET DIRECTORY.

Giving the name of each street and showing what other streets and places run from it or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained; as for instance, wishing to know at what part of Second street No. 168 comes, look at Second street and it is found that Liberty street crosses at 156, Washington street at 178, showing that 168 Second street would come half way between Liberty and Washington streets.

Ciphers are substituted for numbers on streets not fully numbered.

In the year 1852 the Cohoes Gas Light Company was organized with a capital of $50,000. It ranks among the earliest gas companies of the United States.

This Company organized an Electric Lighting Department in 1888, taking power from the Cohoes Company and operating water wheels under 90 feet head. Later a power section was added to this department. The City of Cohoes is well piped for gas, and electric lines for power and light cover the city. Consumers' rates are low and favorable contracts are made for power. The Company is progressive and offers favorable inducements to parties desiring to locate.

Established 1836.

TO rely solely on personal knowledge in doing business is like groping with a lantern. A view of the whole field is given by the classified lists in the DIRECTORY. Names in heavy type, which refer to a space at the back of the book, make it possible to select quickly those who specialize in the line you are looking for. These spaces are devoted to a more complete description of the house in question than possible under a single heading, and save much time and trouble in finding what you want.
